

Clear Browser Cache

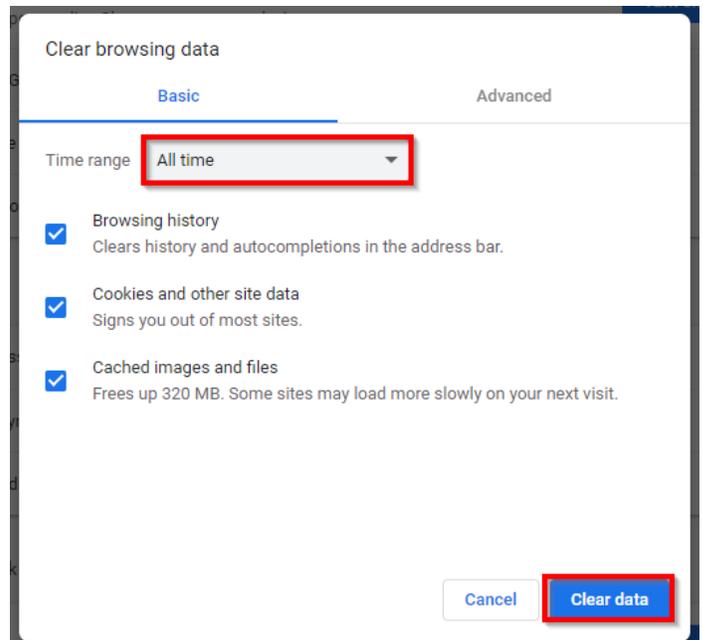

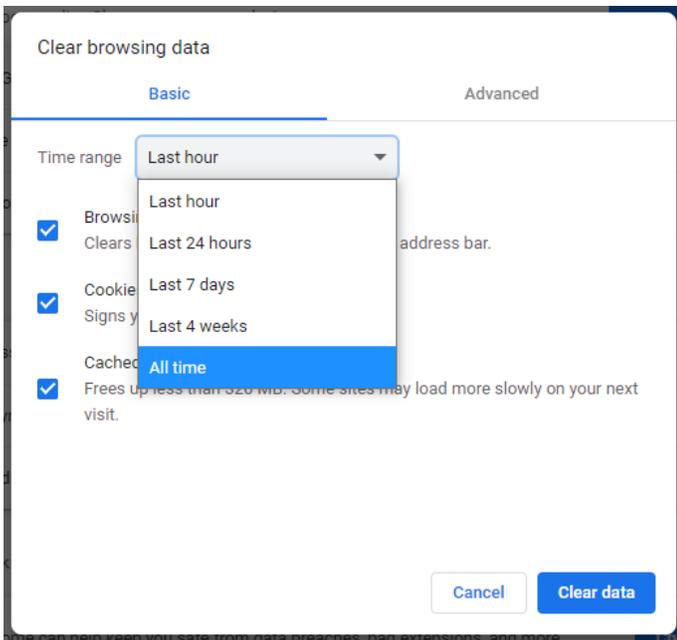

For Windows 10

Google Chrome

Open Google Chrome and click the menu (three dots) in the upper right-hand corner of the browser, click on **More Tools**, select **Clear browsing data**.

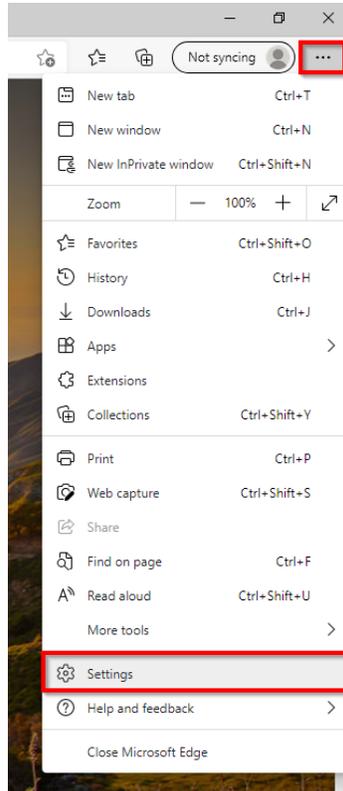

Select **All time** from the time range drop-down options. Check all the boxes under the time range.

Select **Clear data** and Chrome will clear your cache.

Microsoft Edge

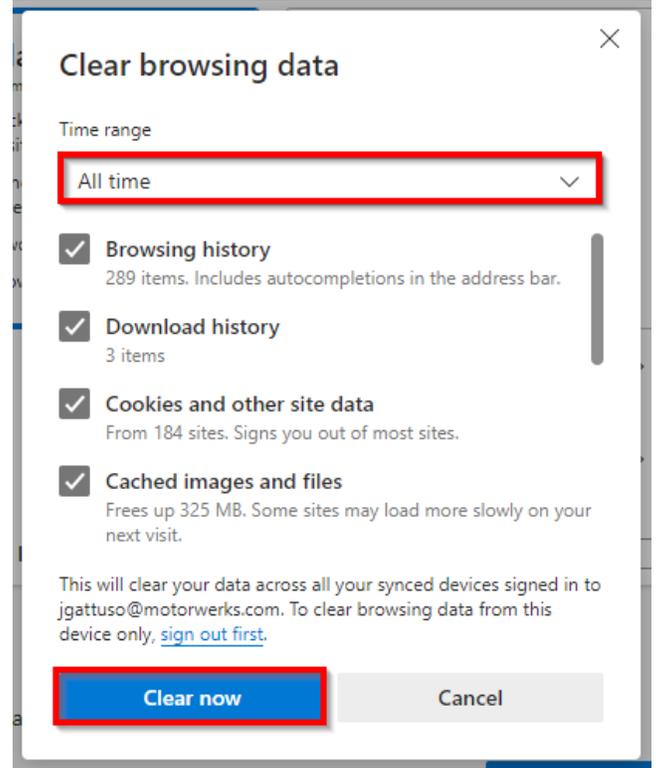

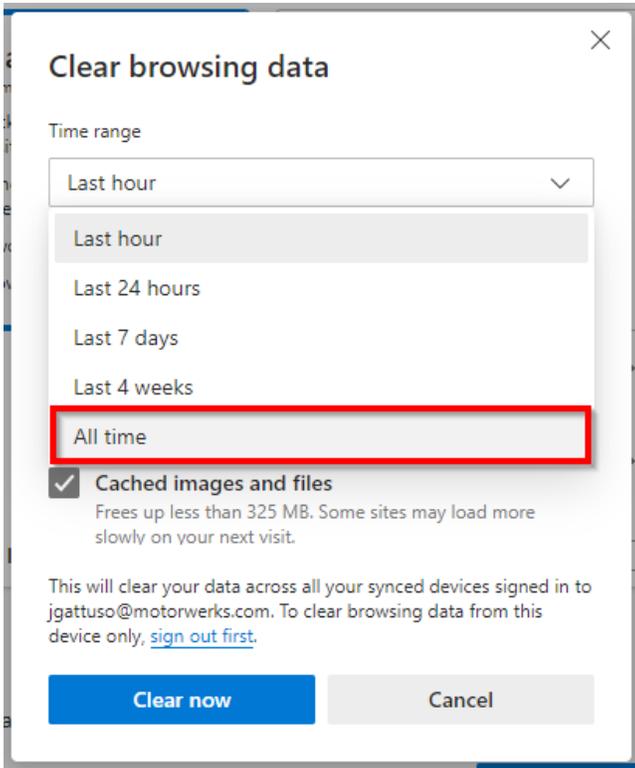

Open Microsoft Edge and click the menu (three dots) in the upper right-hand corner of the browser, click on **Settings**.

Go to **Privacy, search, and services**. Under the “Clear browsing data” section, click on **Choose what to clear**.

A screenshot of the Windows Settings application. The left sidebar shows the 'Settings' menu with 'Privacy, search, and services' highlighted by a red box. A red arrow points from this box to the 'Choose what to clear' button in the 'Clear browsing data' section of the main content area. The 'Clear browsing data' section includes a description, a 'Clear browsing data now' button, and a 'Choose what to clear every time you close the browser' link. Below this are sections for 'Privacy' (with toggle switches for 'Do Not Track' and 'Allow sites to check if you have payment methods saved'), 'Required diagnostic data', and 'Optional diagnostic data' (with a toggle switch for 'Help improve Microsoft products by sending optional diagnostic data...').

Select **All time** from the time range drop-down options. There will be 9 options to check/uncheck below the time range. Check the top 4 boxes (as seen in the picture below) and leave the others unchecked.

Select **Clear now** and Microsoft Edge will clear your cache.
