

Mobile Device Email Configuration

For Android Phones

There are a few ways to get your email on the phone. We recommend using the outlook app because the email app will make you change your phone's 6-digit passcode after creation and will make you change it every 6 months. ADDING YOUR MOTOR WERKS ACCOUNT INTO THE MAIL APP WILL FORCE YOU TO CHANGE YOUR PASSCODE.

Outlook App Configuration (Recommended):

1. Download the Outlook app from the Google Play Store by searching for "outlook". Once it has finished installing, open it.

If you already have the app, open it, and click on the logo that looks like the one below. Then click **Add Email Account**.

2. After opening the app, it will ask you to either add an account or create an account. Click **Add Account**, then press **Continue**.

One calendar for everything

Stay organized with your work and personal calendars in one place

ADD ACCOUNT

CREATE NEW ACCOUNT

3. Enter your email address into the field provided, then press **Continue**.

Enter your work or personal email address.
